

Deep Socket 1/2" D 16mm

Deep 16mm single Hex 1/2" square drive socket. Ideal for car engine maintenance and anywhere that regular sockets are too short for access. The six-sided socket head drives from the flats to provide more torque, useful for freeing seized nuts & bolts, whilst avoiding the risk of rounding. The socket has slightly convex internal faces and drilled out corners, for a solid grip, even on damaged fastener heads. Manufactured from durable chrome vanadium steel with a polished finish. Part of a range of individual deep sockets available in a variety of metric sizes from 10mm to 32mm.

Additional Information

- Size: 16mm single Hex x 1/2"D.
- Deep socket, depth: 77mm.
- Hex (6pt) head drives from the flats to provide more torque, ideal for damaged or seized nuts & bolts.
- Manufactured from chrome vanadium with a polished finish.
