

## Support de synchronisation d'arbre à cames - Diesel 1.9

This revised camshaft setting bracket for VAG now gives even better alignment with 2 ground shoulder screws included in the set. This time saving product from Laser means essential timing adjustment can take place with the vacuum pump and cam cover still in place. The camshaft setting bracket can be offered to the camshaft slot by sliding it along the dowel screws. An additional knob/handle is incorporated in the tool to assist with precision alignment.

### Additional Information

- Utilisé sur les moteurs 1.9 TDI
- Ref constructeur T10098 & 3418
- Application Seat Cordoba - Ibiza / Inca / Leon / Toledo (1999-2006)
-
