

Circuit Tester 12 - 48V

This new circuit tester has been designed to include the usage on 12 to 48V systems.

Additional Information

- Super clear handle give 360° visibility, with 3 metre long spring coiled lead.
- Automatic voltage selection, voltage level being tested indicated by coloured LED's.
- Low current circuit safe - maximum draw 3 milliamps @ 12V.
- Ideal for quick and safe voltage checks on systems up to 48 volts.
- 48 volt MHEV (mild hybrid electric vehicle) safe. CE, UKCA & RoHS compliant.
