

Valve Spring Compressor

Designed to allow the removal of valve springs and valve stem & oil seals with the cylinder head in place.

Additional Information

- For universal use on SOHC and DOHC engines.
- Combustion chamber is pressurised via the supplied spark plug air line adaptor which holds the valve in place during the valve spring compression operation.
- Includes a 22mm compressed air adaptor.
- Fast set up time due to the twin rail pivot system.
- Single handed operation. Airline adaptor has 18mm/14mm (male) threaded end to fit spark plug hole.
