

Kit de calage BMW - N51,52,53,54,55

A specifically designed kit for the N51, N52, N53, N54 & N55 engines. The locking plates have been designed to lock the camshafts in position while other timing procedures are undertaken. The camshaft VANOS sensor alignment tool has been designed to combine two OEM designs, allowing one tool to be used for the applications.
