

Stainless Steel Bucket 12L

A stainless steel bucket with handle and 12L (2.64 imperial gallons) capacity. The spun-metal construction means no seams to trap dirt and germs, unlike traditional metal buckets, making it more hygienic and easier to clean hence it's ideal for a wide range of environments including catering and medical. Manufactured from heavy-duty stainless steel the bucket has excellent resistance to rust, stains, chemicals and corrosion and is far stronger and easier to clean than plastic or galvanised buckets. The bucket can also tolerate high temperatures allowing it to be sterilised with heat and as stainless steel does not absorb odours it is even suitable for brewing, storing pet food or use as an ice bucket. One bucket does it all; indispensable around the workshop, home and garden.
