

Removal Tool for Push-Fit Couplings

An easy to use removal tool for push-fit connectors, as commonly used in pneumatic pipe systems. Designed to fit couplings in sizes 4mm to 12mm, it fits over the connectors and compresses the release collar so that the pipes can be disengaged.

Additional Information

- Removal tool for push-fit pneumatic couplings.
- For quick connector sizes: 4, 6, 8, 10, 12mm.
- Manufactured from steel.
- Can be used with Connect push-fit connectors, Part No. 31897.
