

USB Soldering Iron

Lightweight USB soldering iron capable of being powered by a computer, laptop, power pack or a USB adaptor. Perfect for use as part of a mobile tool kit, or where storage space is limited, and ideal for soldering in situ when used with a USB power pack. It features a 1.2m lead and is supplied with a folding stand. Suitable for use by mechanics, auto-electricians, model-makers and DIYers, both in the workshop and at home.

Additional Information

- USB-powered soldering iron, suitable for using on site when used with a USB power pack.
- Slim size & lack of a bulky mains cable & plug make this ideal for use as part of a mobile tool kit.
- Supplied with a 1.2m USB lead & powered by standard USB socket (1 Amp current draw).
- Heats up to 185°C in approx 15 seconds. Max temp 480°C.
- Features a red LED to warn that it's plugged in, & supplied with a folding stand. CE, UKCA & RoHS compliant.
