

Broken Glow Plug Tip Puller Kit M10

Broken glow Plug Tip removal kit for M10 glow plugs. Glow plugs supplied with cleaning tools.

Additional Information

- Applications include: M10 x 1mm, M10 x 1.25mm glow plug tip extraction tools.
- Unique extended drill bits with crimped and welded ends for increased access and a built in depth control collar to ensure the maximum depth cannot be exceeded.
- Specially machined thread taps, crimped and welded to extra-long extensions for increased access.
- Patented German manufactured brushes constructed using a special twisted core to prevent damage to internal engine parts and driven with a brush holding tool.
- Due to the size of individual threaded components and the nature of the task, all components should be considered consumable. Spare parts are available. Always follow instructions provided.
