

Three Jaw Oil Filter Wrench 60 - 93mm

A magnetic, self-adjusting three arm filter wrench that can remove all oil filters from 60 to 93mm diameter with a 3/8" square drive for use with power bars and ratchets. The spring-loaded jaws adjust automatically and the strong magnetic base holds the wrench firmly in position, for fast, efficient filter removal. The heat-treated carbon steel jaws have a wide, curved profile for a strong grip, even on oily surfaces. A high-quality filter wrench, ideal for professional oil filter servicing.

Additional Information

- Adjustment range: 60 - 93mm.
- Strong magnetic base firmly holds the wrench in position.
- Spring loaded jaws adjust to the size of the filter automatically.
- 3/8"D. Compact design: 65mm x 65mm x 38mm. Weight: 227g.
- Manufactured from carbon steel, with heat-treatment, nickle plating & phosphate finish for strength & durability.
