

Multi Purpose Oil/Fluid Syringe

Large capacity syringe for easy extraction and transfer of oil and other automotive fluids. It features a double rubber plunge seal and a sturdy grip handle for controlled suction power and a clear view barrel for an easy visual check of the quantity and condition of liquid with volume markings in litres and quarts, for accurate measurement. The twist and turn shut off valve helps prevent spillage during fluid transfer and the cap lid unscrews for easy removal of the plunger for filling or cleaning. Suitable for use with brake fluid, AdBlue, anti-freeze, oil, ATF, gear oil and steering fluids. Indispensable for a wide range of automotive servicing and maintenance work including brake master cylinders, oil filter housings, power steering reservoirs, differentials and gearboxes.

Additional Information

- Large capacity (1.5 litre) syringe for fast extraction and transfer of petrol, diesel, oil, ATF, gear oil, steering fluids, brake fluid AdBlue and anti-freeze.
- Flexible hose: 11mm diameter x 840mm. Twist and turn shut off valve to prevent spillage during fluid transfer.
- Screw on cap for easy removal of the plunger for filling or cleaning.
- Clear body with volume markings (litres and quarts) for viewing fluid volume and condition.
- Smaller, 200cc, syringe available under Laser Part No. 5698.
