

Rear Side-Light Removal Tool - for Tesla Model 3

The Tesla Model 3 rear lamp unit is held in place by a large 10 sided screw which also doubles as the boot lid buffer point. Because of the material it is manufactured from it can easily be damaged by use of incorrect tooling (such as pliers, etc.). This special 10 sided plastic socket has been designed specifically for the safe removal of this fixing, allowing safe removal of the tail lights.

Additional Information

- Applications: Tesla Model 3.
- Rear tail light top fixing removal tool.
- 10 sided socket.
- Manufactured from non-marring plastic.
- Use with either 3/8" drive socketry or 22mm spanner.
