

Retractable Safety Utility Knife, Ceramic Blade

An auto-retractable utility knife featuring a ceramic blade for safer handling and ideal for use in the home, office or on the factory floor. The ceramic blade is both harder than steel and harder wearing, lasting up to 10 times longer than a comparative steel blade, meaning that it doesn't have to be as sharp. This makes it perfect for cutting through paper, cardboard, tape and plastic packaging. The handle features an ergonomic grip, suitable for both left and right-handed users and has a storage compartment for a spare blade.

Additional Information

- Spring loaded knife blade automatically retracts when button is released.
- Long life, non-conductive, anti-magnetic and non-rust ceramic double sided blade.
- Ideal for cutting and opening packaging (including corrugated cardboard), arts and crafts, modellers, hobbyists and DIYers.
- Quick and simple to change blade, with additional blade storage in handle.
- Spare blade available, Part No. 61858.
