

Brake Pipe Reamer

This compact reamer features a countersink S2 steel blade to deburr internal diameters from 3mm to 10mm, making it suitable for cleaning the inner bore of metal brake pipes after cutting, together with an ergonomic soft grip handle for comfort.

Additional Information

- Compact internal deburring tool.
- Size range: 3-10mm.
- Effective on copper & cupro-nickel brake pipes.
- PP+TPR soft grip handle for comfort.
- Also suitable for use on stainless steel & plastics.
