

Trim Clip Pliers - 35 Degree Offset

A pair of spring-loaded trim clip pliers with a 35 degree offset, designed for removing plastic push-pin fasteners with ease and without causing any damage to the fastener or the surrounding trim.

Additional Information

- Designed for the removal of push pin plastic body fasteners and clips with centre locking pins (including 2 and 4 groove), without causing damage to the pin or body.
- Also allows for the trim clip body to be gently clamped together to aid installation.
- Length: 205mm; Jaw width: 70mm.
- Manufactured from chrome molybdenum, with the spring-loaded handle vinyl dipped for grip and comfort.
- 80 degree offset pliers also available, please see Laser Part No. 8541.
