

Spot Weld Cutter & Extension Kit

This spot weld cutter kit combines an 8mm HSS twist drill with titanium nitride coating together with a 70mm extender is designed to drill out or cut through spot-welds allowing for the weld to be broken and the welded panels taken apart. The extension adds that extra bit of length to reach otherwise hard to access spot welds, while still offering the strength and support to the drill bit.

Additional Information

- Set includes an extension manufactured from S45C steel to a hardness of HRC 40 (+/-2).
- Extension length: 70mm. Overall length: 100mm.
- High speed steel spot weld cutter M35 TiN coated.
- Size: 8mm x 45mm long.
- 2.0mm hex key included.
