

Spark Plug Socket - 12mm Bi-Hex (12pt) Ducati

The Laser 8800 spark plug socket has been specifically designed to fit the spark plugs used in Ducati V4 engines. The spark plugs used on these engines are among the smallest on the market with an M12 Bi-Hex (12pt) body. Access to the spark plugs is very restricted which means that the socket needs to 1/4" drive with a tapered body.

Additional Information

- Applications include: Diavel V4 & Multistrada V4 (from 2023) Street Fighter V4 (from 2020) Superbike Panigale (from 2019) & Superbike Superleggera (from 2021).
- Designed specifically for Ducati V4 engines. Equivalent to OEM 88713.3633.
- Socket nominal size; 65mm long, 16mm max dia.
- Manufactured from chrome molybdenum.
- 1/4"D. Designed to fit M12 bi-hex spark plugs (NGK LMDR10A-JS; Ducati OEM 67040581B).
