

Long Reach Air Cut Off Tool - 75mm

A pneumatic cut off tool with extended handle for hard to reach and confined areas on a vehicle, suitable for cutting exhausts, holding brackets, axle "U" bolts and door sills. It features a protective head guard, moveable through 360°, with a safety trigger to prevent accidental use and an impact resistant composite handle with a soft grip to help reduce vibration and user fatigue. Designed for use with standard 3" (75mm) cutting discs.
