

Optical Centre Punch Set - 3pc

A super accurate centre punch system that ensures your centre dot is placed in exactly the right place. Ideal when trying to centre pop panels, blocks, studs prior to drilling. Simply use the anti-slip body with the optical magnifier to identify exactly where you want your centre dot and then use the punch in place of the magnifier to produce your mark.

Additional Information

- Ideal for fast & accurate marking out on flat surfaces.
- 9x magnification optical magnifier with cross hairs to find dead centre.
- Features an SUJ2 alloy steel punch.
- Kit base equipped with O-ring to provide anti-slip function.
- NOTE: When centre popping broken studs & bolts ensure the surface has been filed flat & flush prior to use.
